Line

From Pit-Stop to Non-Stop

Manufacturing Industries face the challenge of increasing production efficiency and rolling out new products on time. As the production line gets augmented to meet timelines, it is imperative for organizations to ensure that their plant set-up operates effectively and does not run into intermittent breakdowns. M'ManSys helps you in addressing these business drivers by turbo charging high-speed production without breakdowns through its Maintenance Management platform.

M'ManSys

Steering your Production with Intelligent Maintenance

M'ManSys is a robust, intuitive and a flexible CMMS developed by Axcend. It provides an integrated solution for the plant, asset & maintenance management. Our wide domain expertise in Manufacturing IT and the ability in delivering business benefits to our customers have resulted in the development of M'ManSys. This CMMS package connects & controls asset management, spares & maintenance management among many other capabilities to give the complete plant maintenance details on your desktop.
